

Gold Line® Parking Autocashier

Your 24/7 Automatic Parking Attendant

GL-ACW-P

Replaces ACW-5-P

Product Data and Specifications

NEW

The new Gold Line® Parking Autocashier offers an enhanced 9 rate function feature and a new receipt printer option.

GL-ACW-P

Shown with optional stainless steel mounting base and lighted hood

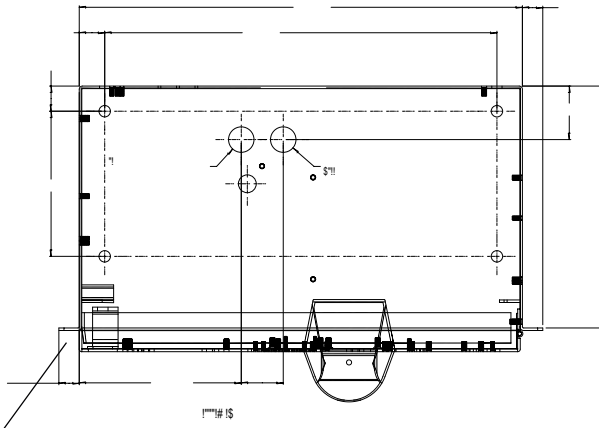

The Hamilton Gold Line® Parking Autocashier is a cost effective solution to your parking needs. This machine will independently collect fees, return change and operate an entrance or exit gate 24 hours a day, seven days a week, eliminating the need for an attendant. Among its many new developments, the GL-ACW-P can now be programmed with up to 9 different parking rates for automatic changes on a daily, weekly or special event basis. This increase in flexibility gives you the opportunity to adjust fees more frequently. A receipt printer option is now available for customers who need a record of their parking transaction. They can choose to collect a receipt with their cash or credit card transactions.

This in-lane paystation is most commonly used by hospitals, universities, municipalities, airports and private lots, in both parking garage and surface lot applications.

The Gold Line® ACW-P is the worry-free choice for reducing payroll costs without compromising reliability.

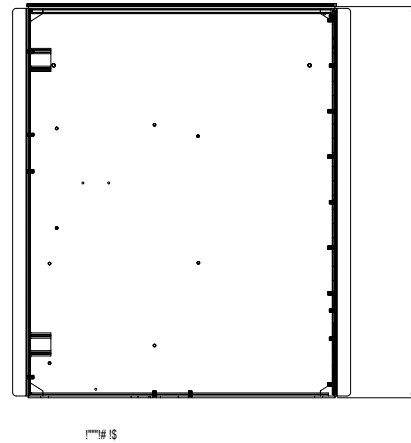

THE GOLD LINE®

Cabinet

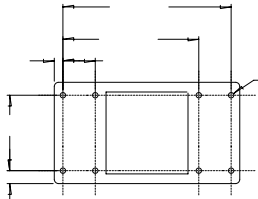

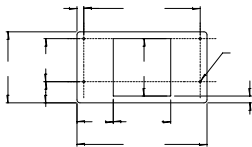

* Flange extends 1" from edge of cabinet.

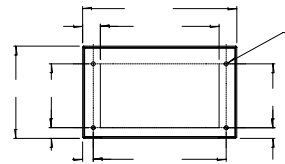

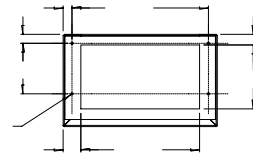

NOTE: Specifications on drawing subject to change.
